CAPTION STUDIO — UPLOAD SCREEN

START HERE

/WELCOME TO CAPTION STUDIO

Caption Studio ek free Windows application hai jo aapke reels aur short-form videos ke liye animated captions generate karti hai — seedha aapke apne computer par.

Ye app kis ke liye hai

Creators aur video editors ke liye banayi gayi hai. Koi editing skill required nahi hai. Video upload karein, caption style choose karein, aur MP4 export kar lein. App aapke Windows computer par **locally** run hoti hai — koi account nahi, koi API key nahi.

WHAT YOU CAN DO

- + Video se captions generate karein
- + 41 animated templates try karein
- + Font, colour, position customise karein
- + Hinglish, Hindi, English mein kaam karein
- + Word-by-word caption edit karein
- + 1080p ya 720p MP4 export karein

BEFORE YOU START

/SETUP SE PEHLE KYA CHAHIYE?

- + Windows 10 ya Windows 11
- + 64-bit computer
- + Setup ke waqt stable internet connection
- + Modern browser — Chrome ya Edge
- + Several GB free disk space
- + Setup ke waqt computer ko sleep mode mein na jaane dein
- + Older CPUs par transcription thoda slow ho sakta hai

Downloaded ZIP file chhoti hoti hai, lekin setup ke waqt Python packages, rendering components aur speech models download hote hain — inke liye extra storage chahiye.

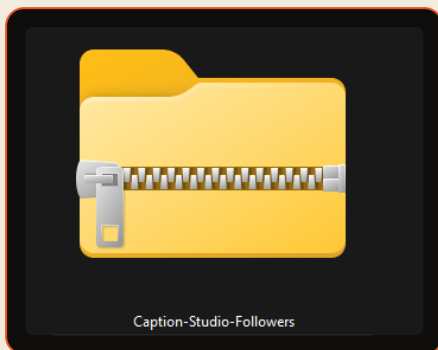

Warning

Mobile phone, Android, iPhone, Chromebook aur direct Google Drive preview se Caption Studio run nahi hogi. Sirf Windows laptop ya desktop par chalayein.

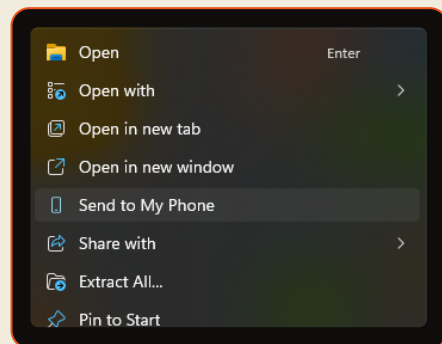

STEP 01

/ZIP DOWNLOAD AUR EXTRACT KAREIN

- 01 Provided Google Drive download link open karein.
- 02 Caption-Studio-Followers.zip download karein.
- 03 Downloads folder mein ZIP file locate karein.
- 04 File par right-click karke "Extract All" select karein.
- 05 Recommended path: folder ko `C:\CaptionStudio` jaisi short location par extract karein.

ZIP FILE IN DOWNLOADS FOLDER

RIGHT-CLICK – EXTRACT ALL

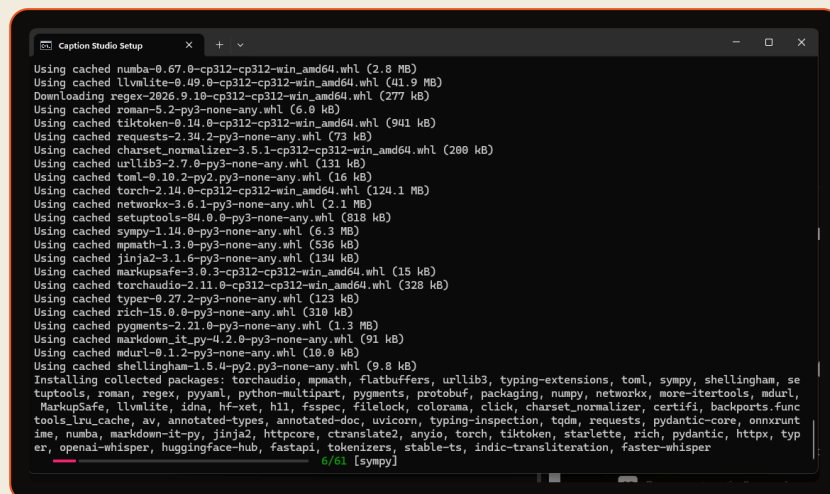

Warning

ZIP ke andar se files directly run mat karein. Google Drive preview se app run mat karein. Folder ka path bahut lamba mat rakhein. Setup complete hone ke baad folder ko randomly move mat karein.

STEP 02

/SETUP.BAT RUN KAREIN

- 01 Extracted folder open karein.
- 02 **SETUP.bat** par double-click karein.
- 03 Agar Windows warning aaye, aur file official link se download ki hai, to “More info” phir “Run anyway” par click karein.
- 04 Setup window open rahegi — ise close na karein.
- 05 “Setup complete” message ka wait karein.

SETUP.BAT — INSTALLING REQUIRED PACKAGES

Note

Setup internet speed aur computer performance ke hisaab se several minutes le sakta hai. Setup Python 3.12, Nodejs LTS, FFmpeg aur transcription/rendering packages install karta hai. Exact time promise nahi kiya ja sakta.

STEP 03

/CAPTION STUDIO START KAREIN

NORMAL START

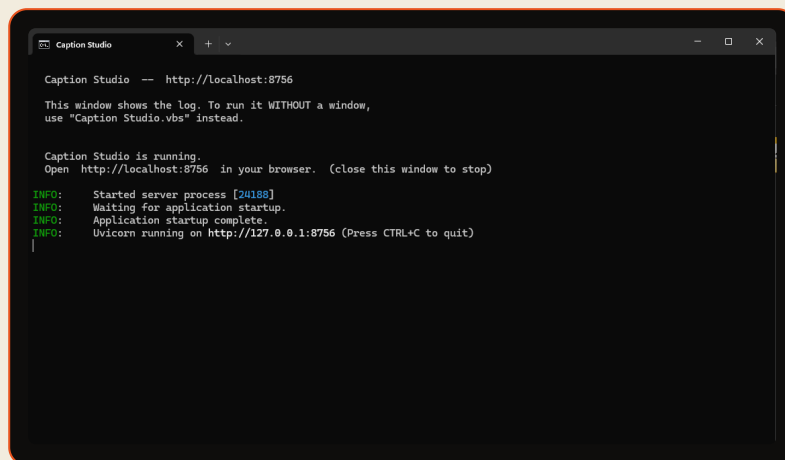

01 Caption Studio.vbs par double-click karein.

02 Browser automatically open hoga.

03 App address: `http://localhost:8756`

localhost koi public website nahi hai — ye app sirf aapke apne computer par chal rahi hoti hai. App band karne ke liye **Stop Caption Studio.bat** run karein.

AGAR NORMAL START KAAM NA KARE

```
Caption Studio -- http://localhost:8756

This window shows the log. To run it WITHOUT a window,
use "Caption Studio.vbs" instead.

Caption Studio is running.
Open http://localhost:8756 in your browser. (close this window to stop)

INFO: Started server process [24188]
INFO: Waiting for application startup.
INFO: Application startup complete.
INFO: Uvicorn running on http://127.0.0.1:8756 (Press CTRL+C to quit)
```

START.BAT — VISIBLE LOG WINDOW

- + Agar browser open nahi hota, **start.bat** run karein.
- + Black window mein error message check karein.
- + **Open Caption Studio.url** sirf tab use karein jab server already running ho.

STEP 04

/VIDEO UPLOAD KAREIN

01 Apna MP4/MOV reel drag-and-drop karein.

02 Language select karein.

03 Roman ya Native script choose karein.

Drop a clip — or click to choose

MP4 / MOV · a reel, 15–60 seconds

Language

Hinglish — Hindi bola, roman likha

Script: auto

Roman = **ke beech mein** · Native = **के बीच में**, Hinglish hamesha roman aata hai.

Spoken script — **optional**. Paste it only when you want the captions word-perfect (~2s instead of a full transcribe).

Aaj hum is video mein ek simple caption workflow dekhenge...

Transcribe

UPLOAD SCREEN — LANGUAGE & SCRIPT

ROMAN ke beech mein

NATIVE के बीच में

Tip

Hinglish reel ke liye “Hinglish + Roman” option use karein.

STEP 05

/SCRIPT PASTE KARKE TRANSCRIBE KAREIN

MODE A — SCRIPT AVAILABLE

- + Spoken script box mein exact script paste karein.
- + “Transcribe” click karein.
- + App exact words ko audio ke saath align karegi.
- + Fastest aur most accurate method — Hinglish ke liye recommended.

MODE B — SCRIPT NAHI HAI

- + Script box blank chhod dein.
- + “Transcribe” click karein.
- + Local Whisper audio automatically transcribe karega.
- + Older computers par slow ho sakta hai — spelling manually check karein.

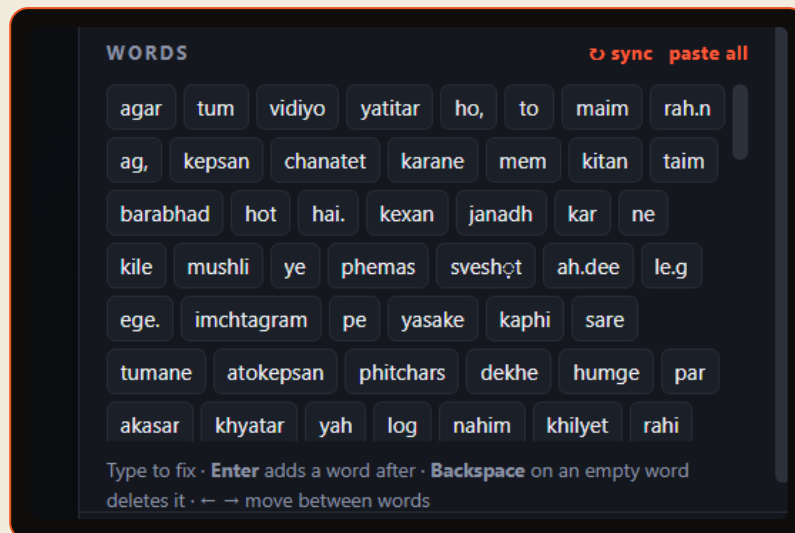

Note

First transcription ke waqt speech model download ho sakta hai. Isliye progress kuch time ke liye slow lag sakti hai.

STEP 06

/CAPTION WORDS CHECK KAREIN

- + Individual word par click karke spelling edit karein.
- + Enter se word add kar sakte hain.
- + Empty word par Backspace se delete kar sakte hain.
- + Arrow keys se words ke beech move kar sakte hain.
- + "Paste all" se complete corrected text replace kar sakte hain.
- + Words replace karne ke baad "Sync" use karein — audio ke saath dobara match karta hai.

WORDS PANEL — SYNC & PASTE ALL

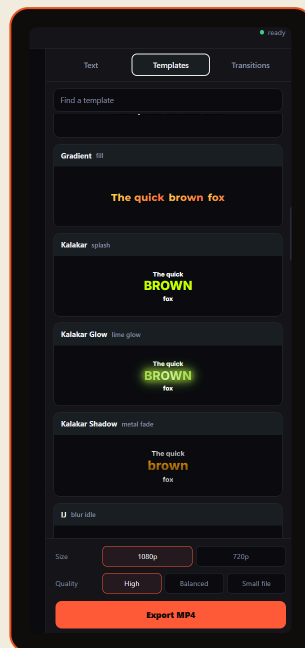

Tip

Export se pehle complete caption ek baar zaroor read karein — especially names, English brand words aur Hinglish spellings.

STEP 07

/CAPTION STYLE SELECT KAREIN

- + Templates tab open karein — 41 styles available hain.
- + Template par click karke apply karein, ya search box se find karein.
- + Primary aur accent colours customise karein.
- + Font, size, outline aur uppercase settings change karein.
- + Top, centre ya bottom position select karein — fine Y-position control bhi available hai.
- + Line mode ya one-word mode choose karein.

TEMPLATE GALLERY

Tip

Instagram UI se bachne ke liye captions ko bottom edge ke bahut paas mat rakhein.

STEP 08

/ANIMATION AUR PREVIEW

TRANSITION OPTIONS

None

Fade

Pop

Zoom

Scale

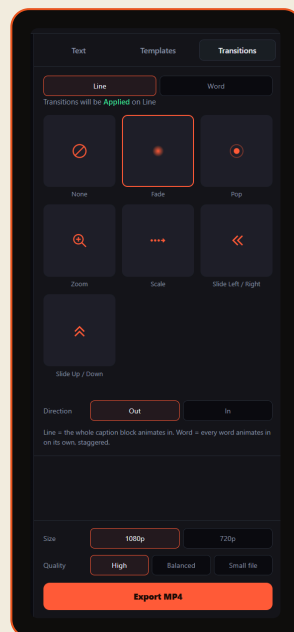

Slide Left

Slide Right

Slide Up

Slide Down

- + Transition line ya individual word par apply ho sakta hai.
- + In/Out direction select ki ja sakti hai.
- + Live preview final export ke close representation deta hai.
- + Video ko play karke caption timing aur position check karein.

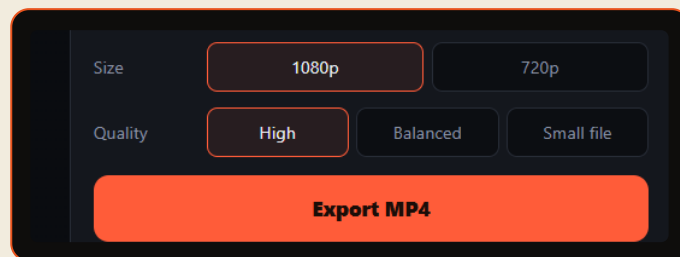

TRANSITIONS PANEL

STEP 09

/FINAL VIDEO EXPORT KAREIN

- 01 Output size choose karein — 1080p ya 720p.
- 02 Quality choose karein — High, Balanced ya Small File.
- 03 Export MP4 click karein.
- 04 Rendering progress complete hone ka wait karein.
- 05 Download captioned.mp4 button click karein.

SIZE, QUALITY & EXPORT MP4

Warning

Rendering ke waqt app ya computer close mat karein. First export ke waqt rendering components download ho sakte hain. Longer video aur higher quality export mein zyada time lagega.

/COMMON PROBLEMS AUR SOLUTIONS

PROBLEM	SOLUTION
SETUP.bat nahi khulta	ZIP properly extract karein. Official copy use karein. Windows Security prompt check karein.
Winget missing	Microsoft Store se "App Installer" install karein. Restart karke SETUP.bat dobara run karein.
Python / Node / FFmpeg not found	Windows restart karein. SETUP.bat dobara run karein.
Localhost open nahi ho raha	start.bat run karke log check karein. Stop Caption Studio.bat run karke restart karein.
Port 8756 already in use	Stop Caption Studio.bat run karein. Caption Studio dobara start karein.
Transcription slow hai	CPU transcription naturally slow hai. Shorter reel use karein ya exact script paste karein.
Captions wrong hain	Words manually correct karein. Paste all aur Sync use karein. Exact script ke saath dobara transcribe karein.
Export stuck hai	Internet aur disk space check karein. start.bat method se restart karke dobara export karein.
Google Fonts load nahi ho rahe	Internet connection / firewall check karein.
App accidentally close ho gayi	Caption Studio.vbs dobara run karein.

/PRIVACY AUR IMPORTANT INFO

- + Transcription आपके अपने computer पर होती है।
- + कोई account या API key required नहीं है।
- + App localhost पर run होती है — इसे public internet server समझकर expose ना करें।
- + Uploaded और rendered project files temporarily app folder में store हो सकते हैं।
- + Sensitive video process करने के बाद app folder के work/output data को review करें।
- + Google Fonts और setup/model downloads internet use करते हैं।

Ab apna first reel Caption Studio के साथ caption करें
